www.ncp-biohorizon.net

BioHorizon project is funded by the European Commission - Grant Agreement no. 652637

Assessment of nutrient imbalances between EU regions and development of innovative management models

Main expertise of BETA Technological Center in the context of the proposal:

- Experience in the agrofood sector, mainly in treatment of animal manure.
- Assessment of agronomic performance, safety and quality of fertilisers and bio-fertilisers.
- Support to public administrations in the definition and development of policies related to fertilisation and nutrient management.
- Knowledge about the state of the art of the current technical solutions for the treatment of animal manure. Direct experience with several treatment technologies.
- Experience in several EU funding programmes (H2020, LIFE, Interreg and others).

Project consortium:

Partners already identified	Partners sought
<ul style="list-style-type: none">- 5 RTDs (Spain, UK, Italy, Ireland)- 4 Companies (Spain, UK, Italy)- 2 Public administrations (Spain, Italy)	<ul style="list-style-type: none">- SMEs- Public administrations- Farmer associations- RTDs

Topics addressed by the proposal:

- CE-RUR-08A-2018: Closing nutrient cycles / Understanding properties and impacts of bio-based fertilisers

Other topics of interest:

- CE-RUR-08B-2019: Closing nutrient cycles/Bio-based fertilisers from animal manure
- RUR-09-2018: Realising the potential of regional and local bio-based economies
- RUR-04A-2018: Analytical tools and models to support policies related to agriculture and food / Developing new models supporting policies related to agriculture
- LC-SFS-03-2018: Microbiome applications for sustainable food systems
- CE-SFS-25-2018: Integrated system innovation in valorising urban biowaste
