Blue Growth + KET Biotechnology

Monitoring the seafloor with new eyes: the HyperDiver technology

Dr. Joost den Haan

HyperSurvey GmbH / Max Planck Institute

www.ncp-biohorizon.net

BioHorizon project is funded by the European Commission - Grant Agreement no. 652637

HyperDiver monitoring technology quickly identifies and evaluates what is present on the seafloor, and creates easily understandable maps (e.g., for politicians, general public)

Live coral

Invasive algae

Seafloor mapping

I am looking for partners/investors interested in our seafloor mapping technology, to conduct environmental assessments, predict effects of climate change, aid underwater construction projects

Production / scale-up

I am looking for partners to upscale the production of our HyperDiver technology, advance our underwater navigation system, make our HyperDiver technology suitable to ROVs and AUVs.

EU funding projects

Cooperation in EU-funded research projects (e.g., Blue Growth)

Keywords: seafloor, mapping, climate change, monitoring, environmental impacts

Current address:

HyperSurvey GmbH
Max Planck Institute for Marine Microbiology
Celsiusstrasse 1
28359 Bremen
Germany
Tel.: +49 421 2028843

Max Planck Institute
for Marine Microbiology
