# Anti-Ageing and Cognitive Training Intervention in a Virtual Environment

Pedro Torrinha  
CCG/ZGDV Institute

Fit for Health 2.0 and HEALTH-NCP-NET 2.0 projects are funded by the European Commission

# Project idea/ Company expertise

Preparing a consortium to submit a proposal to  
SC1-PM-15-2017

The objective of the project is to design, develop and deploy a platform to provide guidance and motivate an active and healthy aging, using non-intrusive technology, acting as a “virtual coach”.

The consortium will address neurocognitive, emotional, social/environmental and biological mechanisms underlying successful aging.

Benefits of an integrated multimodal intervention include cognitive training, physical and dietary activity and promotion of social engagement.

## Keywords

Physical activity, nutrition, cognitive training,  
social networks

# Consortium Partners

The consortium is currently composed of:

- CCG/ZGDV Institute - Portugal
- University of Minho - Portugal
- University of Porto – Portugal
- Rhine-Waal University of Applied Sciences - Germany
- Fraunhofer AICOS Portugal
- Sonae - Portugal
- Ingema – Spain

We are looking for partners in the following areas to close the Consortium:

- Embedded Software allowing oxygen measurement in the brain
- AAL in the fields of physical activity, nutrition, cognitive simulation
- Suppliers of non-intrusive sensors to collect biometric information
