

# Health Partnering Day 2016 7 July 2016, Brussels

session (edit)

## Remove barriers for DISability

Prof. Virginia Ravaioli

TRAMES onlus

# Project idea/ Company expertise

The project should aim at increasing resilience and empowering the young, mitigating the impact of situation of exclusion, discrimination and violence (in disadvantage area), environmental risk factors.

All these aspects are stake when young people are in the process of transition to autonomy and working life (Dynamizer of Council of Europe).

Erasmus+ project mobility: «Empowerment of young people with difficulties».

## Promoting mental health and well-being in the young

Well-being – Young – Social indicators  
Impact on health care systems

Build long term partnership cooperation

## Remove barriers for DISability

Primary prevention intervention is directed towards preventing the initial occurrence of a disorder (mental and behavioral disorder): prevention risk of co-morbidities and social exclusion, addictive behavior place immense burdens on individuals, families and society, remove barrier to the communication, different determinants impacting the health and well-being of young.
