Framework Programme of the European Union

Full situational awareness for customers

- *Objectives:*
 - *to aggregate different solutions into a single customer dashboard*
 - *to provide a communication channel between different components*
 - *to be able to handle large amount of data*
 - *to provide a simple and actionable dashboard for customer*

- *Expected results*
 - *API and bus for fully interactive platform for external apps*
 - *Several different blocks speaking together through normalization schemas*
 - *Large dataset compliant with GDPR*
 - *Create internal/external hooks to automate dashboard actions*
