Description of the Organization

- F-Secure is a global leader in providing security as a service through telecommunication operators and is now also expanding into the Advanced Threat Protection and Cybersecurity Services domains.
- Our award-winning products are available from over 6000 resellers and 200 Internet Service Provider and Mobile Network Operator partners in more than 40 countries.
- Over 1000 employees and 20 offices around the world.
- Has been and is a partner in a number of collaborative projects in Finland and Europe (e.g., ITEA2 EASIClouds, Horizon 2020 SSICLOPS and CANVAS). We also are a partner in EIT Digital.
- F-Secure's Security Labs has a reputation of one of the best anti-malware laboratories in the world. Our Cybersecurity Services Business Unit brings expertise in incident response, digital forensics, penetration testing, and security consulting.

Security for Financial Services

- *Objectives:*
 - *to define requirements for comprehensive security architectures in the Financial Services sector*
 - *to prototype and pilot technology and related processes for securing infrastructures of financial service providers against cyber and physical threats*
 - *to enable security incident investigations*
- *Expected results*
 - *Security requirements and architecture*
 - *Technology prototype and process definition*
 - *Piloting results*
 - *Business models*
