

Horizon 2020 Secure Societies European Info Day and
Brokerage Event

Brussels , 6-7 March 2017

Universidad Politecnica de Madrid

Yod-Samuel Martin

samuelm@dit.upm.es

“You cannot manage what you cannot measure”

- **Objectives:**

- *Analysis and elicitation of useful cybersecurity metrics*
- *Development of a dynamic measurement and monitoring framework*
- *Implementation of mechanisms for confidentiality- and privacy-preserving cross-organizational sharing, aggregation, and analysis of the information*
- *Delivery of visualization techniques for dynamic risk assessment*

- **Expected results**

- *Catalogue of validated cybersecurity attributes and associated metrics*
- *Family of modular techniques and associated software implementations to dynamically measure, monitor and present the security risks and associated threats*

Consortium - profile of known partners and Required Partners

No	Partner Name	Type	Country	Role in the Project
01				Security vendor
02				End-user
03				Standards and best-practice organization
04				SIEM
05				Metrics and measurements
06				Visualization
07				Privacy & Data protection
08				

Description of the Organization

Recent research projects in the domain

- *TRUEESSEC.eu: **Trust-Enhancing Certified Solutions for Security and Protection of Citizens' Rights in Digital***
- *PRIPARE: Preparing Industry to **Privacy-by-Design** by Supporting its Application in Research*

40+ scientific papers & 5 patents in the domain

Delegate at research networks and industrial forums

- ***ECISO WG1 Cybersecurity Assessment and Certification***
- *EDPS Internet **Privacy Engineering** Network*
- *AIOTI, BDVA...*

Organization of international events

- *IEEE International Workshop on Privacy Engineering*
- *International Workshop on Internet of Things Privacy, Trust, and Security*
