  - *Evidence FP7 project*
- *Expertise in*
  - *Semantic Web Technologies*
  - *Data analytics*
  - *Cloud Computing*
  - *ICT Security*
  - *IoT*

# Ontology Repository Services

## Objectives

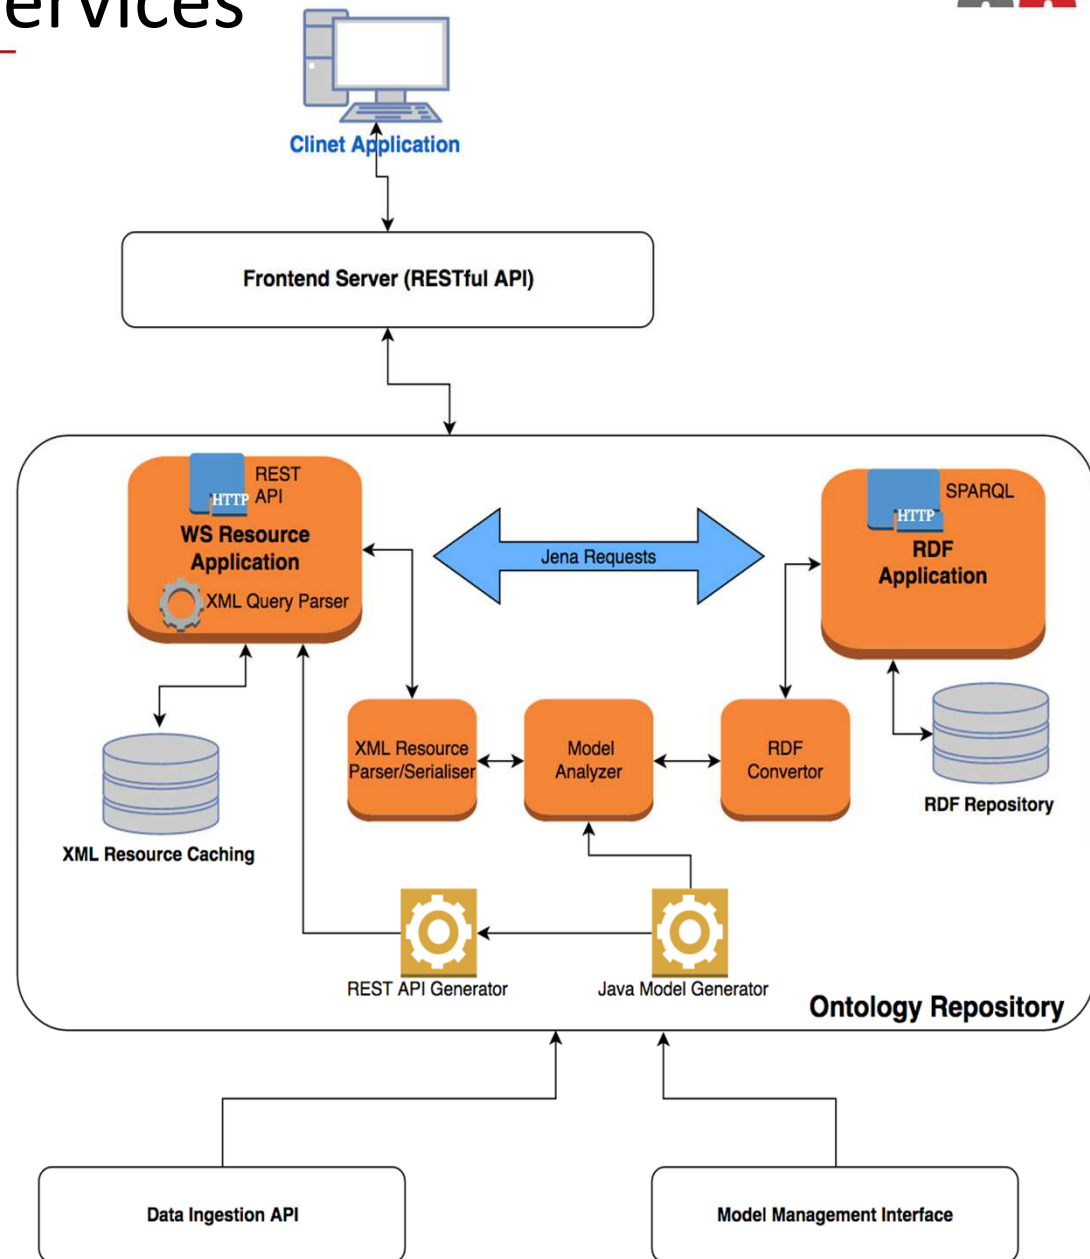

- Data Structure and Classification
- Association Discovery
- Cross-domain semantic linking

## Features

- ⑩ Domain independent architecture
- RESTful API
- Semantic queries on the data model and data itself
- ⑩ Supports federation of SPARQL query results

## Use cases

- ⑩ Emergency Response Agencies interoperability platform
- ⑩ Data privacy profile modelling
